

Wildfire After Action Review

Region: South Slave

Date: Aug 21, 2024

Fire Number: SS009-24

Crew Briefed: SS5 + SS7 + SS9 + SS8

Did you get a briefing prior to being dispatched and was it useful?
ie: was the weather and fire behaviour expected, were they briefed about the potential terrain and area?

Everyday had crews and cat operators briefed

What operational concerns do you have? Discuss state of the equipment, transport to the fire, camp location and communication.

I gave Matt L. suggestions and he kept saying NO, NO, NO. Got tired of working with him. Fire took off where I suggested to put a crew.

Were there any safety concerns? Please fill a hazard/incident report if necessary.

Not having a chopper pad at the end of cat guard was a big one for me.

What went well?

Was good progress, but him calling the shots from his truck was not enough.

Is there anything you would have done differently?

I wouldn't have offered to help.

Are there any lessons learned? Good or otherwise.

Not to work under Matt again.
