PREDICTION FOR: 20/JUN/2025

WEATHER SUMMARY: Chilly, windy, dry

Max Temp 14C - Min RH 24% - Winds N 15G25

FIRE BEHAVIOUR FORECAST: The cool temperatures and higher humidity don't necessarily make the indices drop out of extreme values. Boreal Spruce will maintain a crown fire under the predicted conditions. As long as conditions continue with no precipitation, indices will remain high.

FIRE BEHAVIOUR SPECIFICS

INDICIES

FFMC 91 DMC 66 DC 283 ISI 11 BUI 83 FWI 31

Location	Fuel type	Rate of Spread (m/min)	Intensity Class	Fire Type

SS-009	M2	13	6	Torching

SAFETY: Maintain vigilance on LACES. Tie up any loose ends and close the loop if something is out of order. Lack of fire under extreme conditions can lull us into complacency. Keep informed on what your area of the fire is doing at all times by posting lookouts and base all actions on current and expected fire behavior.

If you have a weather reading instrument please record hourly observations, note any rapid changes, and report out significant developments in fire behaviour.

Wildfire Task/Site-Specific Hazard Assessment

This section is to be completed for crews/individuals at the field level to address task or site-specific hazards. For work tasks not related to wildfire, or for working alone situations, a FP-148 form is required.

Fire Weather Index Reminders

FFMC
< 74 - little chance of ignition
80 - surface fire continuous spread
85 - increase in fire behaviour
90 - high chance of spot fire development
DMC
20 - lightning fires possible
40 - fuel layer aids in spreading, fire behaviour increases
60 - onset for extreme fire behaviour
DC
<100 - very wet
300 - high chance of holdover fire, mop-up concerns
500 - significant ground fire activity
ISI
5 - vigorous surface fire (will vary between fuel types)
10 - threshold for crowning in most conifer fuel types
20 - extreme fire behaviour
BUI
<30 - low intensity surface litter fires
30 - deeper fuels can burn, increase in fire behaviour
60 - threshold for extreme fire behaviour, mop-up problems
FWI
3 - sustained combustion and fire growth
10 - vigorous surface fire, candling/torching
25-30 - onset of crowning, extreme fire behaviour
