

Incident Action Plan

SS052-23

493,426 Ha

September 16 2023

Operational Period 08:00 – 21:00

Got a picture for the IAP? Text 867-373-0493

Approved by: Crystal Collins, Planning Section Chief

Approved for implementation by: Frank Lepine, Incident Commander

 Incident Objectives (ICS 202)	Date & Time Prepared	Fire # SS052-23
	09/16/2023	
Operational Period: 08:00 – 21:00		
GENERAL OBJECTIVES		
Wildland Division Protect Community of Hay River and Kakisa Protect Critical Infrastructure Ground forces to limit growth Heavy equipment bolstering existing fire guards Structural Division Assess properties for structural protection and deploy where needed Mop up impacted areas Maintain Operational Readiness		
GENERAL SAFETY MESSAGE		
Situational Awareness & Trigger Points The 18 Watch Out Situations can be a guide for establishing trigger points where you and your crews may have to back away to your safety zone. These trigger points do not immediately require you to back off, but are a moment when you need to step back and reevaluate the situation. If you are approaching a predetermined trigger point, do the following: 1. Identify & Assess Hazards 2. Identify & Implement controls for those hazards. 3. Continuing operating and evaluating those hazards. If you have to change tactics: 1. Account for all of your people. 2. Make sure your staff, your supervisor, and those working with or around you are aware of the new tactics.		
GENERAL MESSAGES		
<p style="text-align: center;">IAP's are for incident personnel, they are not to be publicly distributed.</p> <p style="text-align: center;">We are missing the Fuel Card – Please check your vehicles.</p>

Fire Behaviour Forecast

FIRE BEHAVIOUR FORECAST # 27			INCIDENT NAME:		SS052							
ISSUED DATE:	ISSUED TIME:	PREDICTION DATE:	OPERATIONAL PERIOD:		PREPARED BY:							
15/09/2023	16:00	16/09/2023	08:00 – 21:00		Eric Pulvermacher							
WEATHER SUMMARY												
<p>Today – Max 20, Min 30-35%, WSW 15G30-35 This morning the trough will move east across Great Slave Lake, shifting the winds to gusty westerly through the early morning. RH reading look to be a bit higher than today, but still could lower to around 30%. The very aggressive fire weather conditions will remain through Saturday.</p> <p>Outlook – AGGRESSIVE FIRE WEATHER CONTINUING...</p> <p>Sunday – Max 23, Min 25%, SLY 15G20-25 The second trough of low pressure will continue to deepen along the Mackenzie Valley and give an increasingly gusty southerly wind across the South Slave zone through Sunday and Monday. Aggressive fire weather looks to continue Sunday.</p> <p>Monday – Max 20, Min 30%, SW 15G30-35 Winds will likely be the strongest on Monday as the trough moves east and strengthens the pressure gradient across South Slave. As well as the gusty winds, low RH readings and warm temperatures will continue, making for aggressive fire weather once again.</p> <p>Tuesday – Max 16, Min 45%, WLY 15G25 a cold front crossing the fire area looks to bring a cooling trend and not nearly as dry. As well, winds look to be easing somewhat. Some scattered showers may accompany the front. There is much model disagreement on just how cool this cooling trend will be. The US model indicates significant cooling, while the Canadian model shows only a return to near or a bit above average temperatures.</p>												
SPECIAL WEATHER BULLETIN: none												
Hay River Wx Station												
Date	Temp	RH	WD	WS	Prec	FFMC	DMC	DC	ISI	BUI	FWI

Sat Sept 16	Forecast	19	45	248	15	0	89	66	755	8	108	28
Sun Sept 17	Forecast	22	30	180	15	0	91	69	760	11	112	35
FIRE BEHAVIOUR GENERAL												
<p>Today: Westerly winds, Intermittent crown, 90% CFB in C2 Observed: FB was somewhat depressed yesterday due to atmospheric smoke, still organized flame fronts in grass and shrub fuel types.</p>												
FIRE BEHAVIOUR SPECIFIC												
<p>The following information is based on; equilibrium fire spread at peak burn, constant forecast wind, flat topography, the absence of suppression action. Hay River wx used</p>												
FBP Fuel Type		ROS – m/min (head)		Intensity Class (IC) & Fire Type								
O-1a (Matted grass 90% cured)		18		IC 2 – Surface Fire								
C-2 (Boreal Spruce)		11		IC 5 – Int Crowning								
M-2 50% (Boreal Mixedwood)		5		IC 3 – Int Crowning								

SAFETY MESSAGE

INCIDENT: SS052-23

September 16th, 2023 Operational Period: 0800-2100

Major Hazards and Risks

Falling Trees- Wind gusts will cause danger trees to come down in burned areas. Continually assess your surroundings while working in high hazard areas. Notify others of the locations of danger trees, and flag them off. If the risk is too high, avoid areas completely.

Flying Debris at Helicopter Landing Sites- Please ensure that there are no loose materials/litter/garbage near the helicopters. Do not leave windows open in vehicles and do not park your vehicles near the helicopters if they have garbage in them. When helicopters are coming to land, monitor for flying debris and be ready to notify them over the radio to pull up if you see debris flying.

Bears- Litter/garbage in camps and along the fire-line is very attractive to bears. Bears will cause damage to equipment (coolers, jerry cans, back packs) and may be a threat to staff. Remove garbage from the line every day.

Fire Order of the Day –Base all actions on current and expected fire behaviour.

Watch-out Situation of the Day

17. TERRAIN AND FUELS MAKE ESCAPE TO SAFETY ZONES DIFFICULT

Trigger Points for Reassessing Situational Awareness

Safety zones & escape routes not Identified

Unfamiliar with local weather and factors that influence fire behaviour.

Uninformed on strategy, tactics, and hazards.

Unburned fuel between you and the fireline.

Getting frequent spot fires across the fire guard.

Weather gets hotter and drier.

Constructing line without safe anchor point.

No communication link with supervisor.

Wind increases or changes direction.

Attempting frontal assault on the fire.

Incident Safety Officer: Robert Berry

ICS Medical Plan (ICS 206)		SS052-23

Hay River Ambulance	73 Woodland Drive	EMS (153.800/158.790)	X			
MEDICAL PROCEDURES						
<ol style="list-style-type: none"> 1. Provide first aid and stabilization on scene. 2. Notify dispatch (55) of the need for a medivac. <ol style="list-style-type: none"> a. Do not move them unless the area is a threat to you and the patient. b. Limit personal information over the radio. 3. All other radio communication should be limited to necessity during a medivac. 4. Listen during a medivac procedure for what is happening to see if you are nearby and able to assist if needed in some of the following: <ol style="list-style-type: none"> a. Assist with first aid. b. Build a helipad. c. Help carry injured person. 5. The TFL/STLD will direct the medics when approaching the helicopter with the injured person. This allows the medics to focus on their patient. 6. Injured person will be assessed by medics and either: <ol style="list-style-type: none"> a. Flown directly to hospital helipad for emergency care. b. Flown to airport for non-emergency care and vehicle transport from there. 						
After hour Emergencies contact 911. All other medical incidents contact medics – see posters at camp.

QR Code for Maps via Dropbox

Last Updated September 12th

IR Hotspots maps provided by Hummingbird can be found in the dropbox.

GPS mapping data (Perimeter tracks, CAT Guards, Helipads, etc.) are to go through **Kathleen Groenewegen**

867-875-8310

Kathleen_Groenewegen@gov.nt.ca

Ensure mapping requests are in by 1700 to allow for production time.
