

| FMD AFTER ACTION REVIEW | |
|--|--|
| Region: <u>Sahtu</u> | Date: <u>04/08/2021</u> |
| Operational Period: <u>10:00-20:00</u> | Group Briefed: <u>Sahtu 1-1, Sahtu 1-2</u> |
| Fire number: <u>VQ 016</u> | Location: <u>Norman Wells</u> |

What was planned?

Contain section of fire with risk of crossing ridge towards Norman Wells.

What was fire weather and fire behaviour?

depressed fire behaviour, low temp, high RH

What actually happened??

Partially contained section on top of the hill while PNZ bucketed below us. Several pressure failures on old hose. 10 foot initial pass, 30 ft backpass on top of hill. Unorthodox hose deployment

Safety issues or concerns:

hazards and incidents require separate reporting on the appropriate form

Wildlife present on Fireline. Extremely difficult terrain. Risk of cold-related issues.

Follow up or corrective actions:

Ensure preparedness regarding resources and fitness. More training and experience will address unorthodox issues
